The attention of the public is called to a great discovery in Dentistry. THE GREATEST ADVANCE STEP EVER MADE IN THE ART. MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to his the annoyance of food getting under the plate while eating. I have discovered a method of so constructing the plate of which the teeth are set that they will not start the discovered to the control of the or drop while eating or speaking, neither will any particles of food get under the plate, ne matter what the condition of the mouth is chick is not true of any method hithertonsed. I have secured Letters Patent for the United

States, England and France.

The improvement is not in material, but in the construction, which seemes the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Frank-
